Profile Summary

I have experience in creating dashboards and reports that make data-driven decision-making easier by turning complex data into simple insights. I am skilled in building interactive dashboards with Power BI to improve data access and understanding. I also possess strong skills in Excel, SQL, and Power BI, which enable me to effectively handle data analysis, manipulation, and visualization, supporting business growth and informed decision-making.

Technical Skills

BI & Visualization Tools:	Power BI (<i>Power Query, DAX</i>), Excel (<i>Pivot tables, Lookups</i>)
Databases:	PostgreSQL
Programming Languages:	Python [Pandas, NumPy, Matplotlib, Seaborn]
Core skills:	Data Cleaning, Data Visualization, Data Modeling, Reporting, Data Integration, Interactive Dashboard & Reporting, and Business Intelligence.

Professional Experience

Sedin Technologies

Chennai, India*Data Analyst Intern*

06/2025 – 09/2025

- Gained hands-on experience in SQL by retrieving, cleaning, and organizing data from databases to ensure it was correct and ready for analysis and reporting.
- Designed interactive Power BI dashboards using DAX formulas to calculate trends, compare data, and present insights clearly for stakeholders.
- Developed real-time streaming reports that automatically updated with new data, enabling teams to track performance and make informed decisions quickly.
- Verified data accuracy and fixed errors to ensure reports were reliable and provided the right information for decision-making.

Projects

Stock Market Analysis Report [KQL Database | Power BI | DAX]

[Link](#)

- Built a Power BI dashboard to analyze stock data (Open, High, Low, Close, AdjClose, Volume) after preprocessing with SQL.
- Designed interactive pages for Market Overview, Comparative Analysis, and Technical Indicators.
- Helped identify return trends, stock variations, and overall performance insights for better decision-making.

Bike Shop Sales Analysis [Power BI | SQL | Power query | DAX]

[Link](#)

- I looked at two years of sales, riders, and revenue data using SQL and Excel for preprocessing.
- I created a Power BI dashboard to monitor revenue, profit, and rider demographics.
- I discovered that registered riders brought in 81% of the revenue and pinpointed peak profit hours and seasonal growth trends.

Banking Transaction Management System [SQL | PostgreSQL Admin]

[Link](#)

- Designed and implemented a Banking Transaction Management System with normalized tables and relationships.
- Built stored procedures, triggers, and functions for managing transactions and logging audits.
- Developed CTEs, joins, and views to carry out financial analysis and reporting.

Education

K S Rangasamy College of Technology

Nammakal, (TN)

Bachelor of Technology(Information Technology) – CGPA: 7.42

2022 – 2026

Certifications

- Oracle Analytics Cloud 2025 Certified Professional – **Oracle (Oracle Cloud)**
- PostgreSQL for Everybody – **University of Michigan (Coursera)**
- Harnessing the Power of Data with Power BI – **Microsoft (Coursera)**
- Extract, Transform and Load Data in Power BI – **Microsoft (Coursera)**
